Dear Parent / Carer

I am writing to inform you about the new French/Spanish home learning website. The website address is <https://school.all-in.org.uk/> and students have been issued with their login details and guidance on how to use the website.

Online vocabulary learning/testing homework will be set weekly and monitored by your child's class teacher. As this is a new website we are experiencing a few glitches and students should speak to their class teacher to report any issues they are having. As we work to resolve these issues there may be some changes to the website and we are hoping that the addition of a multi-choice option will be available in the next few weeks.

The homework to be completed will be visible to students when they login along with the date that it is due to be completed. The aim of the website is to expand and consolidate student's vocabulary which is essential for their success in languages. To ensure that this is a beneficial learning experience and that students reach a pass mark, a minimum fifteen/twenty minutes should be spent on the starter activities and practice tests. Students only have one opportunity to complete the test.

We very much appreciate your support in ensuring that your child completes their homework on a weekly basis to the best of their ability.

Yours sincerely

Miss A Summers
